

Rearranging the Puzzle of Security in the Eastern Mediterranean

Press Release No.1 / Date: 22.5.2023

RD1: Digitalization of Interactive Ethno-Spatial Mapping

We are delighted to announce the completion of our first digital research and mapping product titled Ethno-spatial Divisions Dashboard. You may find the digital publicly available on the LowGeo website <https://lowgeo.com/> under the Visual Material:

<https://www.arcgis.com/apps/dashboards/d78d9a7f821046f3ae97d7fd56fae6ba>

The digital product contains cartographical depictions of the ethnic and religious distribution and state-level concentrations per district/governorates in the Eastern Mediterranean [Libya, Egypt, Israel, Palestinian Authority, Syria, Lebanon and Turkey]. The interactive digital map was designed using the ArcGIS Esri geospatial and digital analysis platform in order to sketch the political status of ethnicities in the region, map the major ethno-territorial divisions in the region [EastMed] and depict the levels of trans-national /trans-border affiliations across the region. Users can find useful information concerning the concentration, size and general status of ethnic and religious kin populations in the region.

For more information about the project, please contact:
