

Rearranging the Puzzle of Security in the Eastern Mediterranean

Press Release No.2 / Date: 27.5.2023

RD2: Digitalization of Ethnic and Religious Population Percentage Maps per state/per District

We are delighted to announce the completion of our second digital research and mapping product titled Ethnicity and Religion Percentages per state and district in the Eastern Mediterranean. The deliverable has been concluded within the framework of the LowGeo programme and can be reached at <https://lowgeo.com/> under the Visual Material.

The digital product contains a series of maps with cartographical depictions of the ethnic and religious percentages at both state and district levels in the Eastern Mediterranean [Libya, Egypt, Israel, Palestinian Authority, Syria, Lebanon and Turkey]. Maps were designed and processed using GeoDa geospatial data depiction platform. Users can find useful information concerning the percentages-concentration of ethnic and religious kin populations in the region.

For more information about the project, please contact:
