

# Rearranging the Puzzle of Security in the Eastern Mediterranean

**Press Release No.3 / Date: 2.12.2023**

## **RD4: Digitalization of Conflict Dyads Statistics**

Correlations Transborder Casualties and Intensity

We are delighted to announce the completion of our third digital mapping product titled Visualization of Conflict Dyads in the Eastern Mediterranean. The deliverable has been concluded within the framework of the LowGeo programme and can be reached at under the <https://www.arcgis.com/apps/dashboards/14ec3eb7239d4680ad2a583597a21e6d> [Visual Material].

The digital product contains a detailed mapping of state and major non-state actors, including regional powers beyond the EastMed region, that have participated in armed conflicts from 2014-2020. Maps were designed and processed using the Esri ArcGIS platform. Conflict dyads can be filtered according to Acting and Rival Sides, year of violent engagement, Intensity of violent engagement, casualties, type of conflict, activity and level of ethnic/religious spatiality.
